Parallel Computing 6 (1988) 391–392
North-Holland

Author Index to Volume 6 (1988)

(The issue number is given in front of page numbers)

Asano, T. and **Umeo, H.**, Systolic algorithms for computing the visibility polygon and triangulation of a polygonal region (2) 209–216
Ashworth, M. and **Lyne, A.G.**, A segmented FFT algorithm for vector computers (2) 217–224
Askew, C.R., Carpenter, D.B., Chalker, J.T., Hey, A.J.G., Moore, M., Nicole, D.A. and **Pritchard, D.J.**, Monte Carlo simulation on transputer arrays (2) 247–258

Bast, H.-J., *see* **Zima, H.P.** (1) 1– 18
Briggs, W.L. and **Turnbull, T.**, Fast Poisson solvers for MIMD computers (3) 265–274
Brooks III, E.D., The shared memory hypercube (2) 235–245
Brooks III, E.D., The indirect k-ary n-cube for a vector processing environment (3) 339–348

Carnevali, P., Timing results of some internal sorting algorithms on the IBM 3090 (*Short Communication*) (1) 115–117
Carpenter, D.B., *see* **Askew, C.R.** (2) 247–258
Chalker, J.T., *see* **Askew, C.R.** (2) 247–258
Chamberlain, R.M., Gray codes, Fast Fourier Transforms and hypercubes (2) 225–233
Chang, H.Y., Utku, S., Salama, M. and **Rapp, D.**, A parallel Householder tridiagonalization stratagem using scattered square decomposition (3) 297–311
Cochrane, D.L. and **Truhlar, D.G.**, Strategies and performance norms for efficient utilization of vector pipeline computers as illustrated by the classical mechanical simulation of rotationally inelastic collisions (1) 63– 85
Cosnard, M., Marrakchi, M., Robert, Y. and **Trystram, D.**, Parallel Gaussian elimination on an MIMD computer (3) 275–296

Evans, D.J., Shao Jianping and **Kang, Lishan**, The convergence factor of the parallel Schwarz overrelaxation method for linear systems (3) 313–324
Evans, D.J. and **Margaritis, K.**, Optical processing of banded matrix algorithms using outer product concepts (*Short Communication*) (1) 119–125
Evans, D.J., *see* **Hatzopoulos, M.** (2) 259

Gerndt, M., *see* **Zima, H.P.** (1) 1– 18
Glickfeld, B.W. and **Overbeek, R.A.**, Geometric specification of scheduling constraints: A simplified approach to multiprocessing (3) 325–337

Harms, U. and **Luttermann, H.**, Experiences in benchmarking the three supercomputers CRAY-1M, CRAY-X/MP, FUJITSU VP-200 compared with the CYBER 76 (3) 373–382
Hatzopoulos, M. and **Evans, D.J.**, Comments on the paper "A short proof for the existence of the WZ-factorization" (*Short Communication*) (2) 259
Hey, A.J.G., *see* **Askew, C.R.** (2) 247–258
